

ANTI FOULING TREATMENT FOR SEA WATER SYSTEMS**MICROBIOCIDES****DESCRIPTION**

AWT-375 is a highly effective biocide and bactericide for use in controlling the growth of shellfish, algae, fungi and micro-organisms found in sea water systems, including sea water intake, filter boxes, bilges, static ballast tanks, oil rig sea legs and trim tanks etc. **AWT-375** is not approved for use in potable water nor in applications where contamination of potable water may occur. **DO NOT USE AWT-375** whilst the vessel is in closed, fresh water, estuarial or river waters.

DIRECTIONS FOR USE

AWT-375 should be initially dosed at the rate of 1.2 – 2.0 litres of **AWT-375** per 10,000 litres of water in the system. This dosage is repeated on weekly intervals until all existing growth are killed. Two doses at this level are usually found to be sufficient. When the system is cleaned, dosage of 0.4 – 1.0 litres of **AWT-375** per 10,000 litres system at regular intervals is recommended. Badly fouled systems must be cleaned before treatment begins. **AWT-375** should be dosed into the water system at the point where it will be rapidly and uniformly dispersed throughout the system.

PRODUCT PROPERTIES

Appearance : Pale yellow to green liquid

pH : 10.5 - 12.4

Specific Gravity : 1.18

Odor : Sulfurous

Storage : Avoid extreme Temperatures

SAFETY AND HANDLING INFORMATION

Protective Measures	Wear chemical resistant gloves, safety goggles and footwear. Use in adequately ventilated areas. Wash hands with water after use. Avoid breathing in vapour.
Spillage & Disposal	Spillage is slippery. Wear gloves, confine spill and stop leak at source if possible. Pump liquid back into original container. Absorb remaining liquid with inert material such as dry sand or sawdust. Neutralize if necessary with vinegar or other diluted acid solution.
<u>FIRST AID</u> Eyes	Rinse eyes with copious amount of water for at least 15 minutes. If irritation persists, seek medical advice.
Skin	Flush with large amount of water, use soap if available. Remove grossly contaminated clothing, including shoes and laundry before reuse. Seek medical attention if necessary.
If Inhaled	If overcome or affected, immediately evacuate victim from exposure area, using proper respiratory protection. Administer artificial respiration if breathing has stopped. Keep at rest. Seek prompt medical attention.
If swallowed	Rinse mouth; then drink 1 or 2 large glasses of water. Do not induce vomiting. Seek prompt medical attention. Never give anything via mouth to an unconscious person.
<u>HANDLING</u> Storage & Transportation	Product should be stored and transported in original containers. Do not store near heat, sparks, flame or strong oxidizers. Store away from strong acids and foodstuff. Keep container lid tightly closed. Store in a cool and dry area, away from direct sunlight. Open container slowly to control possible pressure release.
Packaging	Supplied in 25 and 200 litres non-returnable containers.
