A-132

LIME REMOVER

- Ideal for the removal of lime stone, lime deposits, salt & rust deposits.
- Very effective, acts quickly and thoroughly
- Can be used on all metal surfaces and parts except those made of aluminium, tin and zinc, and those being galvanized
- Water-soluble and non-flammable
- Safe for use on rubber and plastic compounds
- Cost-effective, easy to apply and use

PRODUCT DESCRIPTION:

A-132 LIME REMOVER is an effective acid-based liquid mixture, designed specifically for the removal of lime stones, lime deposits & rust. It is very effective, loosens and removes these deposits quickly, resulting in thorough cleaning

APPLICATION:

DOSAGE

Concentrated: Use without dilution in cases of heavy deposits build-up.

Diluted: A solution of 10-40% may be used in cases of light deposition on large surface areas.

CLEANING PROCEDURE

Concentrated: In areas such as corner cavities, tank skeleton inlets etc., carefully pour A-132 LIME REMOVER. Apply by using suitable hard brush, mop, sponge or any other manual devices to move with rapid and irregular action. Leave it to soak for approximately 5 to 20 minutes and wash

thoroughly with high-pressure water source. Repeat the above cleaning procedure in case of stubborn deposits.

Diluted: Apply the diluted solution in the affected surface area by spraying until it is being completely absorbed. Leave it to soak for approximately 5 to 20 minutes and wash thoroughly with high-pressure water source. Repeat the above cleaning procedure in case of stubborn deposits.

Always add chemical to water not the reverse

Note: Use only acid resistant equipment in the above cleaning procedures.

Approval: The composition meets the criteria for not being harmful to the marine environment according to MARPOL Annex V and may be discharged into the sea when used to clean cargo holds and external surfaces on ships.

PHYSICAL PROPERTIES
