APEX CHEMICALS

AFT-B111 CFPP & PPD IMPROVER

- Reduce wax formation in MDO/MGO/DMA/DMB
- Suitable for LSMGO
- Reduce wax blockage of tanks, pipelines and filters.
- Avoid unnecessary down time and high maintenance cost
- One product that can improve cold properties of marine fuel including both CFPP & Pour Point.
- Low dosage
- More economic

PRODUCT DESCRIPTION:

AFT-B111 CFPP & PPD Improver is a mixture of ashless polymers dissolved in petroleum derived solvent.

Performance

AFT-B111 CFPP & PPD Improver is part of a family of additives designed to improve the cold flow properties of Marine Fuels including both CFPP (Cold Filter Plugging Point) and Pour Point. In MDO/MGO/DMA/DMB and VLSFO type of fuels it offers advantages in terms of reduced waxing in Marine distillate and VLSFO fuel storage, improving pumpability while reducing onboard losses during transfer.

AFT-B111 CFPP & PPD Improver further facilitates manufacture of low Sulphur Marine distillate fuels offering flexibility to blend from a wide range of crude/distillate sources.

APPLICATION:

Treat rates are dependent on the Marine fuel characteristics and performance targets to be achieved, but typical treatment levels are between 50ppm (1:20000) and 500ppm (1:2000).

Direct-metered proportional injection is recommended for all Cold Flow Fuel Additives. For maximum effect, care must be taken to ensure that the fuel is a minimum of 5°C above its cloud point and if possible above 25°C.

PHYSICAL PROPERTIES

Appearance	: White
Relative Density	: 0.898 g/cm ³ at 15 °C
Form	: Liquid
Flash Point	: 68°C

Packaging : Supplied in 25 litres non-returnable containers.

Cert. No. QSP0009

IMO APPROVED
TANK CLEANING
